

# Solutions Prosper

"Improve your processes and the business growth parameters take care of themselves".

"**Strategic Breakthrough and Continual Improvement**" is necessary for the improvement of organizational performance and can result in substantial recurring benefits. The introduction of **ISO 9001:2000** standards provides a fantastic opportunity to the quality consultants both for training as well as consulting for implementation of continual improvement. **ISO 9004 : 2000** recommends adopting strategic breakthrough and continual improvement, the latter featuring strongly in the **ISO 9001:2000**.

*What is Solutions Prosper?*

**SOLUTIONS PROSPER** is a unique PC based software that addresses both the initiatives, namely Breakthrough as well as Continual Improvement, the latter featuring strongly in the **ISO 9001:2000** standard. The software provides the tools integrated with the process, the latter meeting with the recommendation contained in **ISO 9004:2000**. In addition, **SOLUTIONS PROSPER** is well suited for applications in improvement initiatives suggested by, Six Sigma, Process Improvement and Business Excellence Model.

**SOLUTIONS PROSPER** consists of several interconnected modules using recognized structured methodology for process improvement and problem resolution initiatives. Such modules consist of the following:

- **Definition** - helps to define the project in detail in the context of the organization
- **Analysis** - allows for detailed planning and accountabilities for each step
- **Action** - assists in planning and monitoring the implementation of the solutions selected
- **Evaluation** - enables an ongoing review of progress
- **Standardization** - helps in ensuring non reversal of gains achieved
- **Review** - assists in identification of further improvement opportunities
- **Repository** - allows reference to all details of each past project

The remaining modules are integrated with the above process and consist of well-known tools to help resolve problems and drive improvements:

- **Brainstorming** - enables participants to generate innovative ideas
- **Cause and Effect** - allows identification of root causes through fishbone diagramming

- **Process Chart** - enables understanding of each process and proposed improvements
- **Check Sheet** - helps in design of data collection sheets and analysis of collected data
- **Reports** - provides detailed and executive reporting

You may create more than one project for a process improvement initiative. These projects may be handled independently at the same time. It is easy to monitor progress of these projects on a time line through Gantt Charts. The commonly used Process for process improvement and problem resolution is outlined below:

**SOLUTIONS PROSPER** provides facilities to carry out each of the steps stated above with the help of the tools.

### **Benefits**

**SOLUTIONS PROSPER** provides value to both, the end users as well as consultants. Some of the benefits are as follows: -

- **Confidence:** A rigorous & structured approach assures consistent quality results
- **Facts based analysis:** Ensures objectivity in the generated solutions
- **Innovation:** *SOLUTIONS PROSPER* tools encourage creative out-of-box thinking
- **Buy-in:** Participant involvement leads to commitment
- **Results-on-time:** *SOLUTIONS PROSPER* processes and tools get the analysis done fast
- **Early Implementation:** *SOLUTIONS PROSPER* tools help in early implementation of the generated solutions
- **Person independence:** Comprehensive documentation of the project available for reference at all times.
- **Versatility:** *SOLUTIONS PROSPER* may be used effectively by a group and individuals in the pursuit of excellence and creativity

Indeed the cost of **SOLUTIONS PROSPER** is recovered multi times, by saving in time of the participants alone, in a couple of brainstorming sessions.
